CASE SUCCESS

◀ LANDMARK DECISIONS & PRECEDENT SETTING

a formal steering committee where our interpretation was adopted as the official project framework. This led to the immediate resumption of works, the settlement of ourstanding prices, and established a procedural precedent that prevented similar disputes in subsequent project phases

◀ COMPLEX LITIGATION

We served as the **Technical-Legal Bridge**, coordinating between external counsel and the project's engineering teams. Our role involved forensic evidence reconstruction, expert witness preparation, and the translation of complex construction data into a compelling legal narrative. We identified critical "procedural gaps" in the opposing party's claims that had been previously overlooked.

◀ NEGOTIATION WINS

We stepped in as the **Lead Negotiator**, conducting a "Neutral Audit" of the disputed items to establish a factual baseline. We moved the conversation away from emotional positions and toward a **Merit-Based Framework**

GLOBAL REACH

In an increasingly interconnected world, construction and engineering disputes often involve cross-border stakeholders, international funding, and foreign legal frameworks. CIG serves as the vital link between complex local project environments and the high-level expectations of global investors and multinational corporation.

Our Global Capabilities:

- International Framework Mastery
- Cross-Border Dispute Resolution
- Offshore Partnership Model
- Multi-Currency & Quantum Expertise

Distance is never a barrier to precision. Whether we are supporting a board of directors in Europe or managing a site claim in Southeast Asia, our focus remains the same: providing world-class professional service with a deep understanding of the global marketplace
